Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995. To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-5960 or send an e-mail to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC or by fax to (202) 395-6974. Written comments should be received within 30 days of this notice.

Proposed Project

The National Health and Nutrition Examination Survey (NHANES) 1999-2010 Birth Certificate Linkage Study - Pregnant Women -- New -- National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Section 306 of the Public Health Service (PHS) Act (42 U.S.C. 242k), as amended, authorizes that the Secretary of Health and Human Services (DHHS), acting through NCHS, shall collect statistics on the extent and nature of illness and disability; environmental, social and other health hazards; and determinants of health of the population of the United States.

Division of Health and Nutrition Examination Surveys (DHANES) proposes to re-contact women who were pregnant at the time of their participation in NHANES in 1999-2010 and ask permission to link their data to the child's birth certificate data, for the birth that resulted after the survey. This study is funded in collaboration with CDC's National Center for Chronic Disease Prevention and Health Promotion, Division of Reproductive Health (DRH). Participation is completely voluntary and confidential.

NHANES was conducted periodically between 1970 and 1994, and continuously since 1999 by the NCHS. A supplemental sample of pregnant women was selected in NHANES from 1999-2006. This resulted in a total of 1,350 pregnant women. Although this supplemental sample was discontinued after 2006, there are an estimated 150 pregnant women in the NHANES sample for the years 2007-10. This results in a total estimate of 1,500 women for this project.

The NHANES only collected information about the pregnant women at the time of interview. Having information on their children's birth certificates and birth outcomes could provide insight into issues related to maternal and child health. No other survey has the physical examination and nutritional data that NHANES collects on pregnant women.

Consents for these projects will be sent to the appropriate U.S. states, local areas, or territories, where the birth certificate retrievals will then be conducted. Electronic retrieval per records is estimated at five minutes.

NHANES data users include the U.S. Congress; the World Health Organization; numerous Federal agencies such as the National Institutes of Health, the Environmental Protection Agency, and the United States Department of Agriculture; private groups such as the American Heart Association; schools of public health; private businesses; individual practitioners; and administrators. This submission requests approval for two years. There is no cost to respondents other than their time. The total estimated annual burden is 312 hours.

Estimated Annualized Burden Hours

Type of Respondent	Form	Number of Respondents	Number of Responses per respondent	Average Burden per Response (in hours)
1. Women who were pregnant during NHANES 1999-2010	Health Questionnaire / Consent Form	750	1	20/60
3. State/local vital statistics staff (one per U.S. State or Territory)	Locate and transmit birth certificates	57	13	5/60
